

## **Octave™**

### **Setting new standards...**

With a safe working load up to 385kgs, the Octave™ is a state of the art profiling carebed solution to assist and support the daily life of baratric users. With a fully electrical 4-sectioned mattress support as standard, the Octave™ provides optimal comfort and support to the user. The carer are provided with excellent working conditions, and best possible access to the user due to features such as toolfree and easy detachable bedends, frameless construction meaning width of the mattress are equal to the width of the bed.

## Great comfort and design

**Octave™** is a special designed specifically with your bariatric patients in mind. The bed frame extends to the edges of the bed deck for better support.

Using the hand control, the patient or caregiver is able to change the positioning of the head and foot section, as well as the height of the bed. Even though this is a substantial bed, we have still preserved all the well-known qualities of scandinavian design. The silver steel and beech wood combined with the frameless construction makes the **Octave™** appear light..

## Delivery and storage

To make delivery and transportation as easy as possible **Octave™** will be delivered on transportation rack.

Dismounting and assembly of **Octave™** couldn't be simpler despite the size of the bed. Furthermore the transportation rack makes it possible to economise on storage space and very easy to move around between users of the bed.

## Options & Accessories

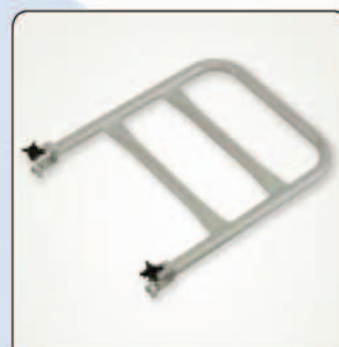

### Lifting pole

The catching handle can be adjusted in both height and depth.

### Extensible bedend

The bedend is extensible and offers possible extension. Choose between 10 cm to 20 cm extension.

### Support handle

Makes getting in and out of bed much easier for the patient.
